CyberCoders

Job Application for Data Engineer

Dear Sally Janavicius

I am writing to apply for the position of Senior Software Engineer with CyberCoders. With over 7 years of experience in Python development, Linux, Docker, physical and cloud infrastructure Azure, and networking protocols, I am well-equipped to contribute to your team's efforts in building enterprise-grade applications for network performance monitoring.

Throughout my career, I have demonstrated a strong ability to design and develop solutions using open-source technologies including Python, targeting a variety of environments, either virtualized with Docker, in the Cloud on Azure, or on linux systems. I have a solid understanding of networking protocols with my time as a system administrator. With my collaborative mindset and effective communication skills, I am confident in my ability to work alongside Product Management and cross-functional teams to drive success.

I am excited about the opportunity to join CyberCoders and contribute to its growth and my own. With my technical expertise, dedication to excellence, and passion for solving complex problems, I am confident that I can make a significant impact as a Senior Software Engineer. Thank you for considering my application.

Sincerely,

Taylor Dickson
